

Sonoclot New Generation ACT

Advanced Anti-Coagulation Management with Separate Results for Factor Xa & Thrombin (IIa) Inhibition in Single TEST

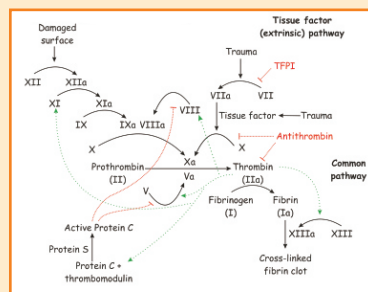

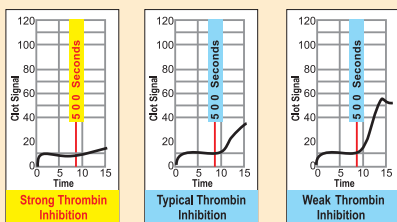

Features:

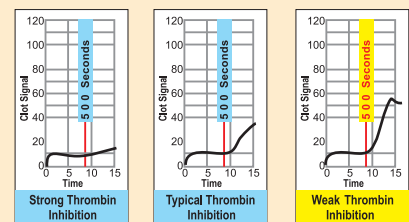

- ▶ ACT & Clot Rate (Rate of Actual Clot Formation) Results
- ▶ Separate Result for Factor Xa & Thrombin (IIa) Inhibition
- ▶ Information on Coagulation Factors & Fibrinogen in one Simple Test
- ▶ Accurate Heparin Anti-Coagulation Management
- ▶ Residual Heparin Detection
- ▶ Low Molecular Weight Heparin Management
- ▶ Improved Hemostasis Management
- ▶ Reduced Usage of Blood Products
- ▶ Portable for use in OR, Cath lab, ICU or Lab.
- ▶ Simple QC Procedure
- ▶ Microprocessor Controlled
- ▶ On Board Data Storage and Computer Connectivity

Made in USA

All ACTs - 500 Seconds

All ACTs - 500 Seconds

The SC1 Sonoclot ACT Analyzer Incorporates Ultra Sensitive Visco-Elastic Detection System to Monitor In-Vitro Hemostasis. This Patented Technology is Ideal for Detecting Initial Fibrin and Monitoring Clot Formation Process.

Exclusively Marketed in India by:
